Statements.

Net Contents:

Bacterial Grease Trap Maintainer is a specially formulated blend of microbes selected for their ability to bio-degrade high volumes of grease including long-chain fatty acids other products cannot break down. More importantly, this product provides the means to bio-degrade the fats, oils and greases (FOG) that are trapped in grease traps without using surfactants. The bio-degradation of the grease devours it and prevents it from simply being mobilized further down the drain.

The unique formulation of **Bacterial Grease Trap Maintainer**:

- Is environmentally friendly and bio-based.
- Contains patented gram-positive bacterial strains to bio-degrade long-chain fatty acids.
- Includes promicrobials which are capable of fast degradation of FOG.
- Has a pH range from 4.5 to 9.8.
- Works with an effective temperature range of 45° - 120°F.
- Maintains optimal FOG degradation through three-fold action.
- Has passed the EPA Methods 1664 and 1664A, proving the grease is not mobilized and allowed to pass through the grease trap.
- Reduces odors that lead to concern from sanitation inspectors.
- When combined with proper kitchen procedures, reduces excessive grease trap pumping by increasing FOG degradation.

Made and Printed in U.S.A.

DIRECTIONS FOR USE:

Dosage rates for grease traps:

For best results treatment should be done after the kitchen has shut down for the day.

Recommendation: To assure that your system is maintained as effectively and efficiently as possible use of a programmable Peristaltic Metering Pump is recommended to automatically feed product into your drains as needed around the clock.

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Flush with plenty of water for at least 15 minutes and call a physician or poison control center.

SKIN: Wash with soap and water. If irritation persists, call a physician or poison control center.

INHALATION: Not applicable.

INGESTION: Rinse mouth and throat. Give two glasses of water to dilute product. DO NOT induce vomiting. Call a physician or poison control center.

An MSDS for this product is available through AMRO's website at www.amroproducts.com, providing 24 hour access. Please read the MSDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
