

Live Bacteria

Caution
Keep Out Of Reach
Of Children.
See Side Panel For
Additional Precautionary
Statements.

Net Contents:

- Organic digestion benefits ALL systems.
- Facultative Bacillus subtilis bacteria adapt to aerobic and anaerobic conditions.
- Powerful deodorant gives instant odor control.

Live Bacteria is a uniquely cultured bacterium plus a strong deodorant that digests and liquifies organic waste, paper, detergent, grease, hair, fat and other wastes, while freeing drains, pipes and grease traps. It restores normal biological activity to septic tanks and sewage treatment plants.

Once the bacteria are established in a sanitary system, they will clean and purge the system of organic debris and continue to keep it clean as long as the product is used, thus providing a safe and trouble-free waste disposal system.

DIRECTIONS FOR USE:

SHAKE WELL BEFORE USING.

DRAINS AND DOWN LINES: Add product as listed below. Start on the lowest floor and work up at the rate of one floor per day. Do not treat the same floor twice. When the top floor is reached, continue treatment for the top floor only. Product has a tendency to settle, therefore, stir or mix before pouring.

Pipe Size	Dosage	Frequency
2-4 in.	4-8 oz. (125 - 250 mL)	2-4 times weekly
6-10 in.	12-16 oz. (350 - 500 mL)	2-4 times weekly

Live Bacteria should be used after the use of sulfuric acid type drain openers (flush system completely) to:

1. Activate the natural digestive process to prevent future clogging.
2. Counteract residual odors.

GREASE TRAPS: Feed one quart (litre) for every 500 gallons of grease trap capacity. For example a 100 gallon grease trap would require 0.2 quarts (6.4 oz.) of product per day.

Product is most effective when added at night or when the trap is least used.

Add the product to a pipe or drain leading into the trap. The injection point should be no further than fifteen feet from the trap.

Made and Printed in U.S.A.

DIRECTIONS FOR USE: (continued)

SEPTIC TANKS: Add 1 pint (.5 L) per 25 cubic feet (.71m³) capacity for the initial treatment. Thereafter, use 8 ounces (237 mL) per week. This should be poured directly into toilet and flushed. If septic tank has become clogged or odorous, add 1 gallon (4 litres) of product directly to the tank through the manhole.

MARINAS AND CAMPSITES: Add 2 ounces (59 mL) per gallon (4 litres) of water in holding tank of boat or RV. Thereafter use 1 ounce (30 mL) per 50 gallons (200 litres) of tank capacity. Then use 1 pint (.5 L) per week for maintenance.

PORTA TOILETS: Add 1 gallon (4 litres) directly to toilet. Cover the solids with water to aid digestion.

CAUTION: Wash hands thoroughly after using. Do not take internally. Avoid getting in eyes or open wounds. Keep out of sunlight. Avoid exposure to extremely hot or boiling water, disinfectants or chlorine compounds.

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Immediately flush with plenty of water for at least 15 minutes. If irritation persists, seek medical attention.

SKIN: Wash with soap and plenty of water. If symptoms develop, seek medical attention.

INHALATION: Remove to fresh air. If symptoms develop, seek medical attention. If not breathing, give artificial respiration.

INGESTION: DO NOT induce vomiting. Never give anything by mouth to an unconscious person. If conscious, give two glasses of water to dilute. Get medical attention immediately.

An MSDS for this product is available through AMRO's website at www.amroproducts.com, providing 24 hour access. Please read the MSDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
