

Living Bacteria with Enzymes

Caution
 Keep Out Of Reach
 Of Children.
 See Side Panel For
 Additional Precautionary
 Statements.

Net Contents:

- Conventional bacteria products take weeks to show visible results. Product goes to work in minutes.
- Enzymes work as predigesters to break down grease, oil, fats, solid waste and paper.
- Three strains of Facultative Bacillus beneficial bacteria digest wastes just as they work in lakes, streams, rivers, and wastewater plants.
- Organic digestion is beneficial to every system it is used in.

Once established in a sanitary system, the **Living Bacteria with Enzymes** will clean and purge the system of organic debris and continue to keep it clean as long as the product is used.

High concentrations of bleach, quaternary disinfectants, or other disinfectants may interfere with the effectiveness of this product.

DIRECTIONS FOR USE:

SINKS, FLOOR DRAINS AND TOILETS: Add 2 ounces (59 mL) of product at the end of each day.

GREASE TRAPS: Feed one quart (litre) for every 500 gallons of grease trap capacity. For example a 100 gallon grease trap would require 0.2 quarts (6.4 oz.) of product per day.

Product is most effective when added at night or when the trap is least used.

Add the product to a pipe or drain that flows into the trap. The injection point should be no further than 15 feet from the trap.

RESTAURANTS: For optimum performance do not scrape large concentrations of food solids into sink. Consult with local Health Department for minimum chlorine concentration necessary for disinfection and avoid excess chlorine.

For best results product should be added with a peristaltic metering pump to get the proper amount of product in the system at the right time.

SEPTIC TANKS: Add 1 gallon (4 litres) of product as a purge dose for each 400 gallons (1600 litres) capacity. Maintenance dose should be 10% of purge dose monthly. AMRO Waste Water Super Concentrate Enzyme Based Degreaser should be used for slow drain fields at a rate of 6 gallons (24 litres) per splitter box or vent tube.

DRAINS AND DOWN LINES: Add product as listed below. Start on the lowest floor and work up at the rate of one floor per day. Do not treat the same floor twice. When the top floor is reached, continue treatment for the top floor only. Product has a tendency to settle, therefore, stir or mix before pouring.

Made and Printed in U.S.A.

8NB558-12

Batch#:

DIRECTIONS FOR USE: (continued)

Pipe Size	Dosage	Frequency
2-4 in.	4-8 oz. (125 - 250 mL)	2-4 times weekly
6-10 in.	12-16 oz. (350 - 500 mL)	2-4 times weekly

FOR AUTOMATIC CONTROL OF FATS, GREASES, AND OIL LEVELS IN DRAINS, GREASE TRAPS, HOLDING TANKS, AND SEWAGE MAINS:

Product should be injected into the line at the greatest period of inactivity, allowing the bacteria cultures to multiply and attach to the sidewalls of the system.

The biodegradation of wastes accomplished with this product is in complete accord with standards for waste treatment nationwide. There is no conversion, suspension, emulsification or "passing-through" effect.

Living Bacteria with Enzymes activates the treatment process right in the drains, traps, holding tanks, and pipes.

CAUTION:

Although this product is very low in toxicity, it should be stored in a cool, dry place. Keep out of sunlight. Wash hands thoroughly after using. Do not take internally. Avoid contact with eyes or open wounds. Avoid exposure to extreme temperatures below 35°F (2°C) and above 130°F (54°C), disinfectants, or chlorine compounds such as bleach.

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Immediately flush with plenty of water for at least 15 minutes. If irritation persists, seek medical attention.

SKIN: Wash with soap and plenty of water. If symptoms develop, seek medical attention.

INHALATION: Remove to fresh air. If symptoms develop, seek medical attention. If not breathing, give artificial respiration.

INGESTION: DO NOT induce vomiting. Never give anything by mouth to an unconscious person. If conscious, give two glasses of water to dilute. Get medical attention immediately.

An MSDS for this product is available through AMRO's website at www.amroproducts.com, providing 24 hour access. Please read the MSDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
